

Environment

Premier Gas UK recognises the importance of global environmental protection. It is committed to meeting this challenge and continues to work towards the implementation of sound environmental standards and practices. The text of the policy statement is reproduced below.

Environment Policy Statement

Our expert knowledge and solutions are helping to create a better world. Premier Gas UK has a responsibility to the community and we are totally committed to environmental protection.

- Ensure sustainable development in environmental protection by careful use of natural resources. It is our aim to avoid pollution or to reduce it to a minimum, above and beyond statutory requirements.
- Work continually toward reducing the burden on the environment, toward minimising associated risks and toward lowering the use of energy and resources, above and beyond the legal requirements.
- Take appropriate precautions to avoid environmental hazards and to prevent damage to the environment.
- Ensure that our environmental policy is implemented effectively by applying appropriate management systems. The technical and organisational procedures required to do this are monitored regularly and constantly further developed.
- Require each employee to act in an environmentally conscious manner. It is the duty of management to increase and encourage awareness of responsibility at all levels.
- Work with all of our business partners and suppliers to promote conformity with similar objectives and work in a spirit of co-operation with the relevant authorities. For example, our manufacturing partners conforming to the following EU Directives: Restriction of Hazardous Substances (RoHS) and Waste Electrical and Electronic Equipment (WEEE) directive.
- Wherever possible, we will actively support our partners in promoting, for example 'Green' initiatives and programmes.
