

Gas Engineer Vacancies

Premier GAS UK Limited are currently expanding their Engineering division and are looking for experienced, high quality gas and heating engineers.

We are looking for engineers that have the ability to source problems/faults on many different types of boilers and systems, can attend to a wide range of emergency issues and who are able to deal with the general public in a professional and courteous manner.

A minimum 2 years fault finding experience with current ACS is a basic requirement. But if you have the drive and determination, we want to hear from you!

- Good salary packages
- Fun & friendly environment
- Overtime opportunities
- Company uniform
- Technical support
- Good holiday entitlement
- Career progression & training

Why work for us ?

- Minimum 2 years fault finding experience
- Excellent customer relationships skills
- Qualified ACS & Gas Safe requirement
- Own tool kit (some equipment supplied)
- Proven track record in Gas Central Heating work
- Ability to work flexible hours (including Weekends & Bank Holidays)

Our Requirements

If you are interested in the above vacancy please email your CV with a covering letter to customer-services@premiergasuk.com

Please ensure you have a valid work permit before applying for a position at Premier Gas UK.
